Expression of Interest

Inviting

from Private Industries / Public Industries/Companies /Entities engaged in Fly ash beneficiation, green sand manufacturing, light weight aggregate production, fly ash bricks & blocks manufacturing, construction materials, waste processing and allied technology to select consortium partners for bidding & successful implementation of such projects.

1. **Introduction :-**

Mahatma Phule Renewable Energy and Infrastructure Technology Limited (MAHAPREIT) intends to participate in the projects for scientific utilization of fly ash, bottom ash and other waste generated from thermal power plants, cement plants, Steel plants, Mines, and other industries through development of green sand, Hight weight aggregates, Fly ash bricks, Blocks and other value added products on Build, Own and Operates (BOO), Public Private Partnership (PPP) or other suitable projects models.

MAHAPREIT intends to invited EoI to get the proposals from Private Industries / Public Industries/Companies /Entities engaged in Fly ash beneficiation, green sand manufacturing, light weight aggregate production, fly ash bricks & blocks manufacturing, construction materials, industrial waste processing utilisation and allied technology to select consortium partners for bidding & successful implementation of such projects. MAHAPREIT focus on sustainable technologies that use industrial by-products and waste materials.

2. **Background:-**

India's total installed thermal power capacity is approximately **239.66 GW** (2,39,660.61 MW) as of August 2026, according to the National Power Portal. This makes up roughly 43.4% of India's overall installed power generation capacity of about 552 GW, serving as a core component for base-load electricity demands alongside growing renewable sources.

Thermal Power Plants use bituminous / Lignite coal for power generation thereby producing approximately 340 million tonnes of fly ash. This huge production of the fly ash is the main factor for contributing to the environmental pollution including water & , air and land pollution and therefore the matter of concern for all of us.

The Ministry of Environment, Forest and Climate Change (MoEF & CC) fly ash policy—cemented through key notifications starting in 1999 and updated via comprehensive rules—mandates 100% utilization of ash generated by coal and lignite-based thermal power plants to protect topsoil, curb pollution, and promote eco-friendly recycling. Thermal power plants (TPPs) must aim for 100 % utilization of the fly ash. and supply ash free of cost to users within a 300-kilometer radius.

The permitted utilization in eco-friendly manner includes making bricks, blocks, tiles, cement, ready-mix concrete, road and flyover embankments, mine void filling, and controlled agricultural use. Presently, the fly ash has been used in various areas like Road and flyover construction: 32%, Cement industry: 27%, Bricks and tiles manufacturing: 14%, Backfilling: 11%, Mine filling: 10% , Agriculture and ready-mix concrete: 1% to 2%.

The policy also provides for the Polluter Pays Principle in which the Non-compliant power plants face strict environmental compensation charges and fines for unutilized legacy and current ash stocks. Also, the Power Plants must install dry fly ash storage silos (minimum 16-hour capacity) and manage ash ponds safely with mandatory greenbelts. The areas used for ash storage can be reclaimed by setting up solar/wind power plants or dedicated plantations. Indian Railways provides freight concessions to transport fly ash affordably for long-distance infrastructure projects.

3. **MAHAPREIT Information :-**

I. **Mahatma Phule Renewable Energy and Infrastructure Technology Ltd (MAHAPREIT)** - MAHAPREIT was set up in April 2021 to venture into RE and Green technology areas and infrastructure projects as fully owned subsidiary of MPBCDC and the Govt. of Maharashtra has allowed to take up RE and Green energy, Infrastructure projects on Govt-to-Govt basis (G2G basis) vide GR dated 10th July 2023.
